In conclusion

Whoever give this game or this this review a tumb down or dislike, ur mom's a ♥♥♥♥♥!!!. euro truck simulator is love euro truck simulator is lyfe ;DDDDDD this game is the best ever. Absolutely beautiful little game. It shows us the wonderful creatures that exist on our planet.. Pretty fun if you're looking for a quick fix of arcade racing/demolition/random zombie slaying. Not an astounding game by any means, and it doesn't bring much new to the table, but it's pretty entertaining if you can get it for pretty cheap.. I have not played a top down shooter as fun as this one in a long time.

Pros:

* Reasonable and fun dodging of enemies and bullets compared to some other shooters where the visuals or the enemies are so overwhelming.

* Brilliant game mechanics. Switching between the two dimensions is brilliant and fun, but that's not the only nice game mechanic in here.

* Local co-op.

* Nice visuals, and the performance was very solid at 60fps, though I'm running it on a powerful machine so I'm not sure if this statement holds true on lower end machines.

* Gamepad (SteamController) worked well out of the box.

Platform specific pros:

* Runs well on Linux (nVidia with binary driver)

* Worked as expected in dual monitors setup.

Cons:

* The game could not remember my screen resolution settings and default to a low resolution setting, so I have to set it every time I launch the game. Though that's not a big problem since changing the resolution was very fast.

* Pressing B on the controller in the menu doesn't work (doesn't take you to upper menu), so I have to use Esc on the keyboard

instead.

UPDATE:

- The upper two issues mentioned in the cons section seems to have been fixed now (not sure if there was an update to the game itself, or maybe some update to my system).
- Another con I would add now that I have finished the campaign is that the campaign is shorter than one would wish. That doesn't change my overall review though. I hope they provide some more levels through a DLC or something.

Overall: Highly recommended if you like top down shooters.. I really wanted to like this game. However i felt that things happened too rapidly with little time to actually manage my department. Instead of having units on patrols i was constantly sending them back to HQ. Then deploying them individually to each event. The few units i did have on patrol would stay there and would never respond to any calls. The game felt like it could be fun but it was just a bit too fast paced for me.. Truly an amazing game. Me and my mam both really enjoyed this game. Got stuck a some points but managed. Thanks for an amazing experience.

I'm following the author on Twitter and I genuinely hope that they make more in the future because their writing is intoxicating. They suggested that they're beginning to work on an outline for another one (yay!) and that they might update more on their Twitter in the future. I'm literally beside myself. I really love this game!

PROS:

- Gender V Sexuality Diverse
- Option to have romantic relationships but avoid sex!
- Great Characters! Oriana
- Absorbing Story. \u2665
- Wonderful replayability!
- Good mystery V suspense
- Genuinely scary at times!
- Ability to be a jerk!

CONS:

- Some of the events seemed a little random
- Steamy scenes were very vague
- Couldn't figure out how to get all the achievements. It's hard to put into words how I feel exactly about Umineko. It's very easy to say "I adored it", but that's too easy. "I'll never forget it", "It's inspiring", "One of the finest works of fiction I've experienced", "Something no one should overlook" - So many things I can say, but nothing feels just right.

Umineko is a story about murder, love, mystery, tragedy, acceptance, and most importantly, magic. To quote another review I read, "it taught me true magic".

I can't really give this a proper review, and honestly if you're looking at reviews for the Answer Arcs you've probably already read the Question Arcs, so you'll get around to this eventually. This is more a letter of appreciation to the people over at 07th Expansion.

Thank you for writing Umineko. I will always treasure this cat box.

Love you to bits, Battler and Beatrice. You deserve some rest.. Very unbecoming of a lady to say but..... i kinda sh*t my pants..... this game sucks i keep getting noscoped by some hardscoper 0/5. Eh, I'm not impressed. If I want what this game's offering, I'll play Carmageddon: Max Damage instead.. What a waste of 5 minutes.
