AirMagnet Survey PRO incorporates leading-edge Wi-Fi 6 design technology to create a powerful wireless network design solution for certified and non-certified Wi-Fi 6 deployments. Through advanced simulation and network design capabilities, AirMagnet Survey PRO enables network professionals to identify and solve Wi-Fi 6 design issues in real-time while allowing them to accurately predict the performance, security, and coverage of their design. For businesses, AirMagnet Survey PRO significantly reduces design cycle time, which can save significant expenses. For IT organizations, AirMagnet Survey PRO automates the deployment of Wi-Fi 6 networks in production and allows network administrators to proactively validate Wi-Fi 6 network performance and security. AirMagnet Survey PRO features include: An accurate Wi-Fi 6 simulation engine that provides a detailed understanding of Wi-Fi 6 technologies Adopt the latest Wi-Fi 6 protocol and optimize design parameters for both certification and non-certified deployments Deploy Wi-Fi 6 networks and explore Wi-Fi 6 opportunities for business operations Performance Validation Network Professionals can use AirMagnet Survey PRO to generate and analyze quality-of-service (QoS) scenarios, identify Wi-Fi 6 design issues, evaluate the performance of Wi-Fi 6 devices, and pinpoint best Wi-Fi 6 deployment practices. Highly Accurate Wi-Fi 6 Simulation Engine Using a highly accurate Wi-Fi 6 simulation engine, AirMagnet Survey PRO can accurately simulate the performance of Wi-Fi 6 at a greater range of device types. Deployment Validation AirMagnet Survey PRO uses certified test sets and algorithms, along with a certification-specific design reference platform, to reduce the false positive rate for wireless devices under evaluation and to detect any potential security issues early in the design process. Coverage Validation During deployment, AirMagnet Survey PRO generates real-time coverage maps for Wi-Fi 6 devices and enables network administrators to validate coverage and identify coverage-limiting design issues. Design Validation AirMagnet Survey PRO lets network professionals design, deploy, and validate Wi-Fi 6 networks to reduce the risk of network security and device compatibility issues. Automated Design Process Network professionals can use AirMagnet Survey PRO to analyze the requirements of Wi-Fi 6 networks and predict the performance, security, and coverage of Wi-Fi 6 deployments at all network device and infrastructure levels. 82157476af
